ONECLOUD NETWORKS LAUNCHES SMALL BUSINESS PROGRAM FOR UNIFIED COMMUNICATIONS

OneCloud Networks' small business program enables startups and small businesses to leverage an all inclusive, unified communications suite to give them competitive edge today and grow with them tomorrow.

Frisco, TX, May 2, 2016 – OneCloud Networks (OCN) today announced a program to kick of National Small Business Week, solidifying their commitment to the success of startups, entrepreneurs and small business environments. The All Inclusive Small Business Package includes complete voice, collaboration and mobility functionality, accelerating organization's time to revenue while minimizing their costs. With a complete UC suite small businesses get the tools they need to be competitive and grow their business. As a hosted solution, in the cloud, OCN provides a fully managed, end-to-end solution that can expand and morph with businesses as they grow.

OCN's comprehensive Small Business Unified Communications solution includes voice, web meeting, chat/instant messaging, audio and videoconferencing, and desktop sharing as well as more traditional phone capabilities such as auto-attendant, music on hold, professional greeting, hunt group, and voicemail. Complete with unlimited long distance throughout the US and Canada. The solution comes with an app for computer, mobile and tablet that is integrated with the desktop phone (if users choose to have one), so users can conduct business from anywhere while maintaining a consistent business identity and phone number. All features are available from a single push of a button within the app, enabling users to switch back and forth among devices or with video and desktop sharing, all without interrupting the call. Further, the solution comes with Outlook integration, Chrome dialer, and full portal management capability.

"Communications today is about much more than voice if a business is to be competitive in the marketplace," said Haider Mirjat, OCN Chief Solutions Officer. "Small businesses need the same tools as a larger businesses, perhaps even more so, to gain a foothold and compete on a big business level. The use of video is a game changer in business, but has been too expensive for small businesses. Now it comes as part of the package. OCN is committed to small business success. "

Small organizations will experience several key benefits by subscribing to OCN's Small Business solution including:

➤ **Enhanced Features and User Centric Experience** – The UC app equips small business customers with a true mobile experience and access to a broad range of [Unified Communications](#) services. An enhanced user experience is provided with all features and functionality available from a single interface and click of a button. Available for desktop, mobile and tablet, tied with deskphone (if users choose to have one).

➤ **Real Time Team Collaboration –** Full HD audio/video conferencing with moderator controls; desktop sharing; guest participation via browser, WebRTC and/or audio dial-in. No need for multiple logins and numerous accounts. Collaboration has never been more easily accomplished.

➤ **Scalable Solution and Fully Managed Service** – The All Inclusive UC solution includes the full feature set. Users can be added easily, and expanded capabilities such as CRM integration and Call Center are available. As a fully managed service, OCN provisions and maintains the system, enabling small business owners to focus on growing their organization.

"OCN is a forward thinking innovator that recognizes the technologies, products and services small businesses need to gain competitive advantage," said Michael Schaefer, Vice President RNO Sales, BroadSoft. "We are thrilled with OCN's commitment to enabling small business success and scalability, and fully support them in these efforts."

Since 2007, OCN has been a BroadSoft authorized service provider, leveraging the BroadWorks® and BroadCloud® platforms to rapidly deliver hosted UC solutions to small businesses and mid-market enterprises. With offices in the Dallas and New York City areas, OCN provides services within North America and is expanding to the United Kingdom.
