

BroadSoft UC-One® Communicator

UC-One® is BroadSoft's portfolio of Unified Communications and Collaboration (UCC) services, designed for service providers who are looking to address their customer's demand for new and innovative apps and services.

Our UC-One portfolio meets the needs of a wide range of customers, from cloud-based VoIP and PBX all the way to advanced UCC services such as instant messaging and presence, video collaboration, desktop and file sharing, conferencing, mobility and more.

The UC-One portfolio also offers "UC-One Communicator", an end user application that runs on all major desktops, laptops, smartphones and tablets. This enables users to access business communications and collaboration services from their favorite devices - wherever they happen to be.

UC-One Communicator

Simplify

- Increase reachability through single-application access to all communication services on mobile devices, allowing employees to work from anywhere.
- Check presence status, exchange IMs, share files and get information quickly.
- Call with video to connect remote locations, building consensus and improving understanding through visual cues.

Innovate

- Connect to external partners and customers for full UC using only a browser with WebRTC.
- Streamline workflow with integration to market-leading environments like Salesforce.
- Eliminate capital costs and reduce operational expenses with a Hosted Cloud Service from a UC-One-powered Service Provider.

Accelerate

- Speed up decision making with multi-party voice, video and collaboration on laptops, smartphones and tablets.
- Improve teamwork by bringing together individuals and virtual workgroups for scheduled and impromptu meetings.
- Utilize desktop sharing to give an entire project or pitch team the ability to view demonstrations and presentations in real-time on their own devices.

A scalable solution for all market segments

BroadSoft UC-One® Communicator

Summary

BroadSoft UC-One offers a broad portfolio of UC applications and services, that includes end user applications such as UC-One Communicator. The UC-One portfolio meets the needs of a wide range of market segments, from cloud-based PBX and SIP Trunking all the way to advanced UCC services.

UC-One can be delivered via the BroadWorks software platform, which resides in the service providers data center, or through BroadCloud managed services, which is BroadSoft's fully managed cloud service. To learn more about BroadWorks and BroadCloud, please visit www.BroadSoft.com.
